Expanding this background with SQL, Python/pandas, Power BI and API-based analytics through DACA, with a focus on turning reliable data into business decisions.

SKILLS

Technical: SQL (PostgreSQL), Python, pandas, Power BI, DAX, Supabase API, Git/GitHub, Jupyter Notebook

Analytics: Data cleaning, validation, JOINs, aggregation, RFM segmentation, KPI analysis, dashboarding, data storytelling

Business & Soft Skills: Budgeting, forecasting, P&L, cash flow, project profitability, stakeholder communication, process improvement

DATA ANALYTICS EXPERIENCE

DACA Data Analytics Career Accelerator — UrbanStyle Case Study | 2026

- Analyzed and validated 10,000+ sales records using SQL, Python and pandas, including key-uniqueness and data-quality controls.
- Segmented 2,540 customers with RFM analysis; VIP Champions and Loyal customers represented 44.65% of customers but 72.57% of analyzed Monetary value.
- Built and validated an API-based Python pipeline; identified and resolved a pagination issue involving 60 duplicate and 60 missing records.

SELECTED PROJECTS

RFM Customer Segmentation — Python & pandas | Segmented 2,540 customers and documented value, retention and data-quality findings. [GitHub](#)

Tartu Store Management Dashboard — Power BI | 2024 revenue €260,044; +13.4% revenue and +16.5% order growth, with management interpretation. [GitHub](#)

PROFESSIONAL EXPERIENCE

ENERSENSE AS (formerly Empower AS / Eesti Elektrivõrkude Ehitus AS) | 04/2002–12/2025

Progressive roles: Business Controller — Power Division; Business Controller — International Division; Finance Manager — Estonia; Member of the Management Board; Chief Accountant — Baltics.

- Led budgeting, forecasting, performance analysis, management reporting, cash-flow and project profitability processes across multi-country operations.
- Connected financial and operational data with business context, improving reporting, controls, processes and management decision support.
